Belt Guide.

Guarantees high speed and quiet reliable operation. Mounting is provided by locking the roller mount into special slots provided in the heavy duty beam. This eliminates movement but still allows easy maintenance of the mechanism.

Motor and Gearbox.

The SL200 has 24volt brushless motor and self-lubricating reduction gearbox for smooth and quiet operation.

Controller.

Providing infinite adjustments to open/close, brake, open timer, variable torque to motor to suit variable door weights.

Operator housing

Heavy duty extruded aluminium housing with long life rail.
